

Johan Sverdrup & future possibilities

Johan Sverdrup is one of the five biggest oil fields on the Norwegian continental shelf. With expected resources of between 1.7 – 3.0 billion barrels of oil equivalent, it will also be one of the most important industrial projects in Norway over the next 50 years. The development and operation of this enormous field will provide revenues and jobs for coming generations.

First-phase development work can provide some 51,000 man-years of work in Norway; 2,700 man-years in the production phase.

Congratulations to Aibel and subcontractors

Aibel has been awarded the contract for engineering, procurement and construction for the deck of the drilling platform on the Johan Sverdrup field.

The contract has an estimated value of NOK eight billion. In addition to Nymo, who will build one of the modules, Odfjell and National Oilwell will also make important contributions.

IKM Ocean Design

In addition IKM Ocean Design has been awarded the Johan Sverdrup Infield Pipelines FEED contract.

IKM Consultant will work closely with IKM Ocean Design to secure highly skilled personnel to meet their future demands. IKM Ocean design employs engineers within the areas of subsea field development, subsea pipelines, subsea structures and topside engineering.

IKM Consultants

IKM Consultants is now experiencing demand from contracts awarded towards Johan Sverdrup and is seeking skilled personnel within all disciplines to meet future demands on Johan Sverdrup.

IKM Consultants have major frame agreements which give us the opportunity to give our consultancy service directly to Aibel and all subcontractors.
